

Golden Baby Goldenrod

Solidago canadensis 'Golden Baby'

Height: 28 inches

Spread: 24 inches

Spacing: 20 inches

Sunlight:

Hardiness Zone: 2

Other Names: Goldkind

Ornamental Features

Golden Baby Goldenrod has masses of beautiful ray-like plumes of gold flowers at the ends of the stems from late summer to late fall, which are most effective when planted in groupings. Its narrow leaves remain green in color throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Golden Baby Goldenrod is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Golden Baby Goldenrod is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Golden Baby Goldenrod will grow to be about 24 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
